## EXPERIENCE

### Software Engineer

Nov 2024 – Present

*JetBrains*

*Berlin, Germany*

- Implemented key features for B2B AI governance in JetBrains Central, including IDE provisioning, ACP and MCP management, and connection testing for AI providers, built to scale to 14M users
- Co-maintained IDE Services, a legacy on-premises solution with 18 paying customers
- Deployed the system from scratch, including setting up the Kubernetes namespace, visualizing metrics, and building the CI/CD pipeline
- *Technical stack:* Java/Kotlin, Spring, TypeScript/React, Kubernetes, Grafana, Prometheus

### Visiting Associate

Aug 2024 – Sep 2024

*BCG Platinion*

*Frankfurt am Main, Germany*

- Conducted workshops at DB InfraGO to implement new planning software for the German railway network
- Gathered over 600 requirements and created over 60 capabilities in a Scrum-of-Scrums framework
- Created burn-up charts from Jira data to visualize the progress of Agile Release Trains (ARTs) toward milestones
- *Technical stack:* Jira, Power BI, Excel, PowerPoint

### Software Engineering Intern

Apr 2023 – Oct 2023

*JetBrains*

*Berlin, Germany*

- Built a collaboration plugin for IntelliJ IDEA end to end (design, frontend, backend, QA testing)
- Integrated Telegram, GitHub, and Slack APIs

### Android Developer

Nov 2021 – Nov 2022

*University of Washington*

*Remote*

- Designed, built, and published two Android apps for a research study in the field of psychology [\[publication\]](#)
- Set up the entire IT environment for running the experiments, including data collection and analysis
- *Technical stack:* Android Studio, Kotlin, Flask, Nginx, SQL

### Teaching Assistant

May 2021 – Feb 2022

*Hasso Plattner Institute*

*Potsdam, Germany*

- Held exercise sessions and oral tests for the lectures Linear Algebra and Internet Security
- Graded assignments and designed scenarios and scalable environments for local Capture the Flag (CTF) competitions
- *Technical stack:* Docker, Kubernetes, reverse engineering in C

### Full-Stack Developer

Mar 2020 – Dec 2020

*Hasso Plattner Institute*

*Potsdam, Germany*

- Created an educational web app used by over 100 students for 1.5 years during the pandemic
- *Technical stack:* Python/Django, HTML/CSS/JavaScript/jQuery

## EDUCATION

### M.Sc. in IT-Systems Engineering — GPA: 4.0/4.0

Oct 2022 – Oct 2025

*Hasso Plattner Institute*

*Potsdam, Germany*

- Thesis: Exploratory Programming with Result-First AI Code Generation
- Interests: Game Theory, Human-Computer Interaction [\[publication\]](#), Large Language Models [\[publication\]](#)

### B.Sc. in IT-Systems Engineering — GPA: 3.9/4.0

Oct 2019 – Sep 2022

*Hasso Plattner Institute*

*Potsdam, Germany*

- Thesis: Active Learning for Digitizing Handwritten Historical Patient Records
- Focus: Cyber Security, Algorithms & Data Structures, Deep Learning [\[publication\]](#)

## TECHNICAL SKILLS

**Languages:** Java, Kotlin, TypeScript, JavaScript, Python, SQL, C, HTML/CSS

**Frameworks & Libraries:** Spring, React, Django, Flask, jQuery, PyTorch, pandas

**Tools & Platforms:** Docker, Kubernetes, Grafana, Prometheus, Git, IntelliJ IDEA, Android Studio, Nginx, Jira, Power BI
